

# HERE'S WHY THE PATENTED ZIP-UP TWIN ZIPPER DOOR IS THE "PEEL & STICK" ZIPPER DOOR CHOICE OF PROFESSIONAL CONTRACTORS.

## PATENTED ZIP-UP ZIPPERS ARE BUILT TO LAST LONGER IN ANY WEATHER CONDITIONS WHILE MAINTAINING A STRONGER BOND.

ZIP-UP zippers are manufactured with a high strength blue woven poly backing. The zipper slider has pulls on both sides to allow for easy opening and closing from either side of the ZIP-UP door.

All ZIP-UP zipper components are suitable for indoor and long-term outdoor use in any weather conditions and can be applied at temperatures ranging from -20 to 150 degrees F. The adhesive is machine coated onto the corona treated woven poly backing across the full 3-inch width of the zipper, ensuring high-strength bonding and a tighter seal onto the poly tarp than competitive products.

When properly installed, the ZIP-UP Twin Zipper Door provides airtight containment as specified in the SSPC Guide 61.

## FRONT ZIPPER VIEW

Our patented poly woven zipper will stay water-tight and last longer than the poly sheeting to which it is adhered.

## BACK ZIPPER VIEW

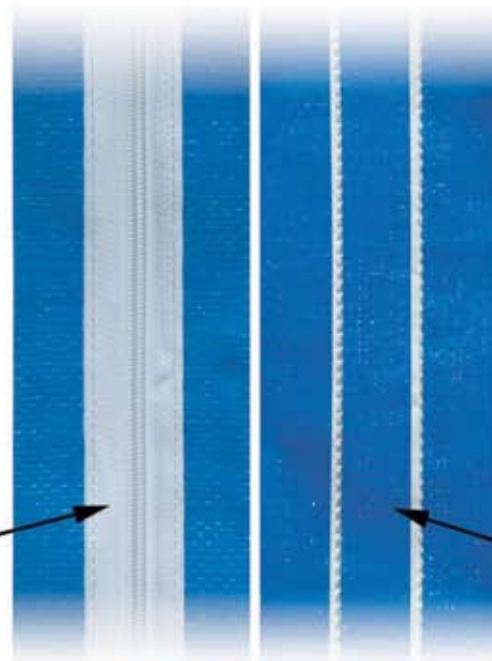

Our adhesive is machine coated onto the corona treated woven poly backing across the full 3-inch width of the zipper.

## NO OTHER ZIPPER ADHESIVE STICKS LIKE THE ZIP-UP ORIGINAL "PEEL & STICK" ZIPPER DOOR ADHESIVE.

ZIP-UP's unique adhesive has been formulated with a "quick-stick" capability that enables the zipper to be repositioned during the initial installation. Once the zipper has been positioned, the adhesive cures to form a high-strength bond to the poly sheeting.

The "quick-stick" feature of the ZIP-UP zipper saves time and money on the jobsite. No more wasting time with inferior zippers that won't stick or that can't be repositioned. **With ZIP-UP it's quick and easy to get it done right!**

ZIP-UP's unique adhesive is one of the many reasons that the Original "Peel & Stick" ZIP-UP Zipper Doors are the choice of professional contractors everywhere.

## THE ZIP-UP PATENTED ZIPPER

Apply the two zippers at any width you choose. This allows the ZIP-UP "Peel & Stick" Twin Zipper Door to be rolled-up and down creating a wide entrance and exit containment barrier for dust and debris. By placing the zippers even wider apart, the Twin Zipper Door is very convenient for moving large equipment and materials in and out of sealed areas. The Twin Zipper Door is great for construction, abatement, remediation, painting, sanding, and other jobsite projects where containment is required.
